GameSpring is an online and mobile game studio specializing in casino and card games since 2003.

HISTORY

Beginning

GameSpring started as a computer game developer. Kelly Park and James Park, both software engineers, decided to found a development studio with a focus on casino and card games, another one of their passions.

Early years

In the early years, the company focused on North and East Asian markets, China and Japan in particular. Over the years, they managed to build a large user base while developing various casino games such as Blackjack, Poker, Roulette or Baccarat.

Recent years

GameSpring entered the mobile market in the early days of the smartphone era, utilizing their experience to create several casino apps and also make a foray into social networking apps and casual games.

Today

As of today, Baccarat Online is GameSpring's best selling-game and is now being played in 130 countries. In 2014, they announced that they will be launching an original billiard game on the North-American and European markets.

Baccarat Online 3D is a complete renewed version of the game Baccarat Online, launched in 2012. Already a success on Android, the game gathers the largest Baccarat online community in the world with 30,000 monthly active users.

KEY FEATURES

Squeeze

Baccarat is an exciting game, and a lot of that excitement comes from slowly uncovering the cards in front of the whole table and revealing the players' fate. Baccarat Online 3D allows players to have that feeling with its squeeze feature.

Social

Baccarat Online 3D is first and foremost a community of Baccarat enthusiasts who can meet and compete with other players from around the world. It offers possibility of both inviting friends or make new ones.

Leaderboards

Baccarat Online 3D gives players a chance to compete in a world wide challenge with thousands of other players. There are daily and annual leaderboards with prizes for the top 10 players.

Various stakes

Players all start with 10K in chips but they can climb up to the high roller tables where the Baccarat masters are.

SCREENSHOTS

Players can experience the thrill of Baccarat with the authentic squeeze feature.

Baccarat Online 3D offers 3 different ways of uncovering the cards, 3 different leaderboards, and an advanced scoreboard.

SCREENSHOTS

The Tap&Slide mode is another way of keeping the suspense by slowly uncovering the cards.

The advanced scoreboard helps players in studying the card patterns and determining how to bet.

SCREENSHOTS

Top players are rewarded for their rankings on the daily or annual leaderboards.
